Please convert all mp3s to WAV or AIFF . This can be done using itunes or numerous online audio converters . e.g

<http://audio.online-convert.com/convert-to-wav>

## Video Delivery in Detail:

### 4:3

If your project is 16 : 9, please export all 16 : 9 videos as 4 : 3. Optionally export with letterbox

### Codec

Our VJ software is Resolume Arena . Resolume is a bit picky about the video formats that it plays as not all formats and compression types are suitable for VJ. You must therefore use the DXV3 codec . It is free. In [this Video](#) you can see how to create a DXV3 file using free software [MPEG Streamclip](#). Below you will find links to download the software and the required DXV3 codec .

### MPEG STREAMCLIP Converter für MAC und WINDOWS
